

## How to Log in to the Cirrus Platform

SignalPro will now use a new Login and Authentication service

### Login

Run SignalPro.

Welcome dialog will display.

Click "Login".

This will launch a browser window and display the “Sign in / Sign up” page.

## Sign in with your existing account

[Forgot your password?](#)

[Sign in](#)

Don't have an account? [Sign up now](#)

## Sign in with your social account

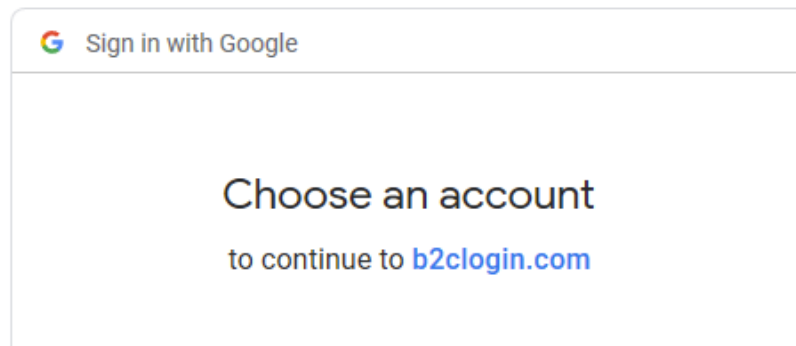

Google

If you have more than one serial number, unique email addresses will be necessary for each. Use sub-addressing (aka plus-addressing) through your email client or contact EDX for assistance.

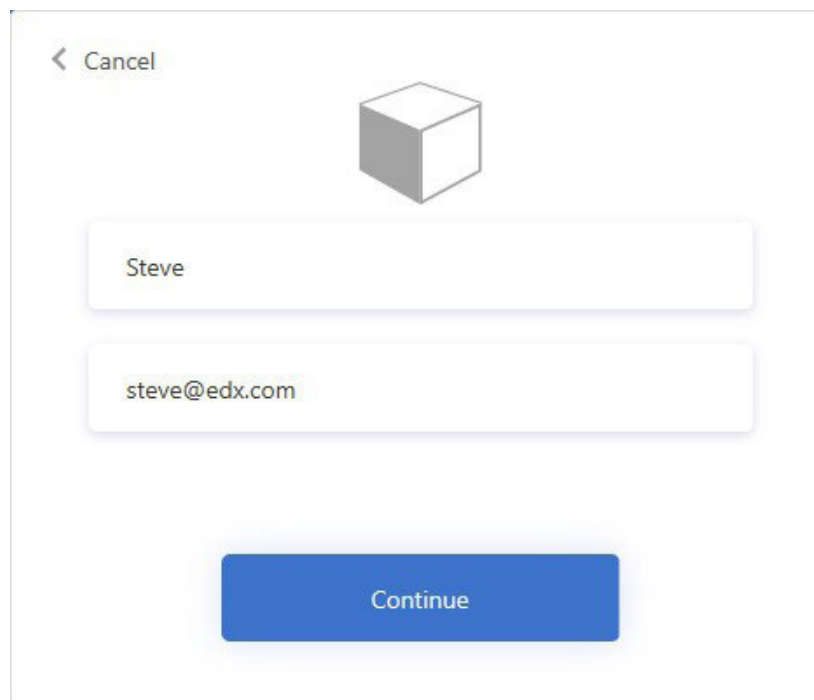

## Signing up with a Google Account

Click on the Google option if you are using a Google account. Customers may not have a Google account and will need to use the 'Sign up now' option (instructions later).

Next, a prompt will come up asking to select a Google account. The accounts are listed, but removed from this screenshot. Select your Google account.

A page with account info will display.

Click 'Continue' to finish and SignalPro will start. SignalPro will remember your login credentials for two weeks, at which time, you will be required to log in again.

## Signing up without a Google Account

Anyone not using the Google option will need to create an account. Below the 'Sign in' button, where it asks "Don't have an account?", click "Sign up now".

myemail@edx.com

Send verification code

New Password

Confirm New Password

Display Name

Create

Here you will fill in your email address and click "Send verification code".

Sign in with your company email address.

Contact us if you would like to request an account/email change.

Once the verification code is received, type it into the box:

Click “Verify code” and, if successful, continue to enter a password and Display Name.

Click “Create”.

Now you can Login and use everything like normal.

SignalPro will remember your login credentials for two weeks, at which time, you will be required to log in again.
